

## **Environmental Policy**

Environmental Solutions International Ltd. is committed to providing leadership on sustainability:

1. To increase efficient use of resources through an on-going programme of review and improvement designed to reduce consumption across all areas of our and our clients operations.
2. To review waste and recycling opportunities and work with suppliers and customers to minimise the total amount arriving on our and client sites and going to landfill.
3. To adopt a sustainable approach to purchasing taking into account the environmental impacts of production, delivery, consumption and disposal - Life cycle analysis.
4. To meet and preferably to exceed all Legal requirements applicable to operations and activities.
5. To engage and encourage all stakeholders to reduce environmental impacts.
6. To draft an Annual Environmental Performance Report, and make the document available to both stakeholders and the general public.
